## Industry experience

Founder

At Addmio, my team and I are making 3D printing accessible to creators around the world. We do this by developing and offering affordable and accessible online courses on our own platform; [addm.io](http://addm.io) Addmio is the first e-learning start-up that is fully focused on 3D printing.

Mar 2020 - Present

AM Designer

As Additive Manufacturing Designer I designed and coordinated the manufacturing of all the metal demonstrators and benchmark parts. I also led design projects with industrial customers and universities and hosted DfAM workshops, training sessions and webinars.

Oct 2017 - Mar 2020

3DP Engineer

At Shapeways I worked as a 3D Printing Engineer in different teams with a wide range of 3D printing technologies and materials. I assessed 3D designs, prepared print jobs, operated and maintained industrial 3D printers, and printed, cleaned, and post-processed 10,000+ parts.

Jan 2016 - Oct 2017

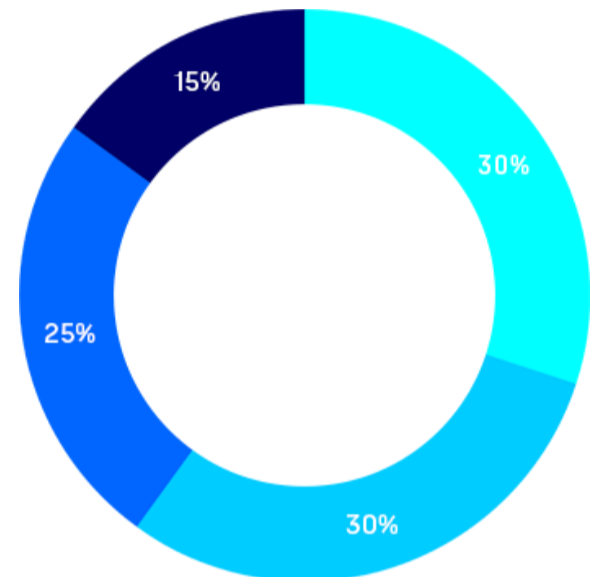

Founder

I founded sample.studio when I was 20 and started with freelance graphic design and image editing for automotive companies. In the following years I created websites, animations, design visualization for architectural firms and I hosted creative workshops at primary and secondary schools.

Oct 2006 - Mar 2019
